

A. READING

Read the text below and answer the questions that follow:

GETTING AHEAD IN THE 21ST CENTURY

Have you ever wondered whether you have the skill that you need to succeed in the 21st century? If you have to succeed in this century you have to:

1. Keep learning. About thirty years ago, nobody was designing apps for mobile

Phones or using social media to reach new customers. Now these are popular jobs for graduates. As the world of work changes, we need to change too. In the past, you just had to ask your uncle to get you a job in his company. These days we need to identify our strengths and constantly improve on our skills. Business guru Heinz Landau suggests spending ten percent of our time on personal improvement for example learning a language or a new computer programme. As somebody once said, "If you work hard on your job you can make a living. But if you work hard on yourself you can make a future."

2. Don't be afraid of failure. If you don't believe me, look at Thomas Edison,

the inventor of the first light bulb, or Jimmy Wales, founder of Wikipedia. Edison tried at least six thousand different materials for his light bulb before finding one that worked. That is six thousand failures to find just one success. And before Wikipedia, Jimmy Wales had tried and failed to start several internet businesses, but none of them was profitable. Failure however didn't upset Wales. It gave him useful experience and knowledge. When you work for a company, though it's worth remembering the words of a famous British businessman, Alan Sugar "I don't mind mistakes. I just don't like people making them twice."

QUESTIONS

1. How's the world of work different now than it was thirty years ago?

2. Give your interpretation to the following statement: "If you work hard on your job you can make living. But if you work hard on yourself, you can make a future".

3. Who suggested that you should spend ten percent of your time on personal improvement?

4. What did failure do to Jimmy Wales?

5. What was the outcome of Thomas Edison's 6, 000 with a single experiment?

B) ENGLISH IN USE (10MARKS)
