

EXAMINATION OF STATISTICS DESCRIPTIVE

By Dr. TANGWA Mark
Resit Second Semester 2023-2024
Time : 3 hours
BEM 1

Reflection questions (4 mks)

- Distinguish between simple and synthetic indice
- Define qualitative and quantitative (Discrete and continuous) characters

Exercise 1(6 mks)

The following distribution gives the yields of five in kgs as follows

Crops	Quantity (Kgs)
Plantain	20
Cassava	30
Beans	10
Maize	50
potatoes	40

- what is the character study and its nature
- represent this information on a bar chart and pie chart

Exercise 2(10 mks)

Consider a distribution of students of BME1 for which we are interested in their weights in kg

Size of students in kg	Absolute frequency
200-300	16
300-400	24
400-500	18
500-700	26
700-900	20

Answer the following questions

- What is the population study, its character and nature
- Represent this information on a cumulative frequency curve
- Calculate the modal class, mean and median
- Calculate the variance and coefficient of variation
- Calculate the following quantities Q_2 , D_5 , and P_{50}

Good Luck!!!
