

INTRODUCTION TO DATABASE

Class: BEM2

CA

Duration: 1h30mn

The following theoretical part contains 3 multiple-choice questions with 1 mark available for each and two standard questions with 2 marks each.

Part 1: Theory

1. Which of the following could be considered an entity?
a. Phone number b. Eye color c. Student d. Age
2. Which of the following could be considered a relationship?
a. Enroll-in b. Customer c. Course d. Letter
3. Which of the following could be considered an attribute?
a. Title b. Car c. Book d. Depends on
4. Map the ERD to relations.

5. Create a suitable ERD for teams, players and games. Each team would have a unique name, have a non-player who is the coach, and have several players. Each player has a first and last name and is identified by a number (1, 2, 3, etc.). One player is designated the captain of the team. Assume a game occurs on some date and time, and is played by two teams where one team is called the home team and the other team is called the visiting team. At the end of the game the score must be recorded.
