

BASIC COMPUTER TOOLS 3

Class: B2EM

Final Exam

Duration: 1h30min

The following practical part contains 14 questions with 14 marks available.

Part 2: Practice

1. Copy the exam folder from the drive Epreuve to your desktop and rename it with your full name.
2. Open the file called store.accdb from your folder. Open the Items table.
3. In the Items table, add the field below. Save and close the table

Field Name	Data Type	Field Size or Format
SellByDate	Date/Time	Short Date

4. Create a new table with the three fields and their properties as shown below.

Field Name	Data Type	Field Size or Format
FoodID	Autonumber	Long Integer
FoodCode	Short Text	10
FoodName	Short Text	25

5. Set the FoodID field as the primary key. Save the table as Food.
6. Add the following records to the Food table. Save and close the table.

FoodID	FoodCode	FoodName
1	007b	Marmalade
2	094f	Cheese

7. Open the Customers table and sort the table by LastName in descending order. Save and close the Customers table.
8. Select the Item Details table. Export the Item Details table in Microsoft Excel format as items.xlsx and save to your folder. Click close to continue if a save export steps message is displayed.
9. Delete the Discount table. Click Yes to continue if a warning message is displayed.
10. Create a query using all the fields from the Customers table that will show those customers who have purchased a product with the ProductID 2. Save the query as Product and close the query.
11. Create a simple form using all the fields from the Customers table. Accept default settings. Save the form as Customers Details and close the form.
12. Create a report using all the fields from the Customers table, grouped by LastName, which will show the average CustomerSpend. Accept all other default settings. Save the report as AvgSpend and close the report.
13. Open the Food report. Add a label with your brand's name to appear on the right-hand side of the report header and save.
14. Print one copy of the Food report to PDF. Save and close any open files. Close the database application.
